Dear colleagues!

My name is Petro Syniehub. I am the owner of the MIR VESOV group of companies from Ukraine. We have been manufacturing and selling weighing and measuring equipment since 2000, and since 2008 we have been a developer of elevator overload control systems. Our systems were bought by all the largest elevator manufacturers in Ukraine and Russia.

In connection with the armed aggression of the Russian Federation against Ukraine and full-fledged military operations on the territory of our country, our work on the Ukrainian market has stopped. We also deliberately left the Russian market because of aggression, which is why we are looking for new sales markets ... We want to continue working, develop the economy of Ukraine, and pay salaries to our employees. You can help us with this by showing interest in our product and taking it for tests. With such a simple action, you can support us, our employees, Ukrainian business and Ukraine right now.

Since entering the market of elevator components and devices, to the present day, more than 50,000 devices of our design have been delivered to our customers around the world. Among our developments there are ready-made solutions for overload control systems with various places and methods of installation, overall dimensions and sensors, including: under the cab, in the cab frame, in ropes, in various suspension systems. The key characteristics of our products are reliability (less than 0.5% of complaints, 3 years warranty), measurement accuracy and competitive price.

At the moment, in Europe, our equipment is supplied (or tested) by our partners to such factories as: KLEEMANN, Pappas elevators, I.C.M. Lift, Vimec s.r.l., Imem Ascensores, Hidral S.A., Ganser Maschinen, Riedl Aufzugbau, Kone, Minos, Metron, Doppler SA, TEQ Elevators, Telco elevators, Orona, WECO.

My team and I are ready to consider your any request, choose an analogue from our range or develop an overload control system according to your terms of reference.

With respect and hope for your support of our company and Ukrainian business,

Owner of the group of companies «MIR VESOV» (Kyiv, Ukraine)
Petro Syniehub,
